DETAILED ACTION

This Final office action is in response to applicant's Amendment filed August 25,
 No claims were amended nor added. Claims 1-2 are still pending in the application.

Response to arguments

- 2. Applicant's arguments filed August 25, 2009 with respect to the 112 second paragraph have been fully considered but they are not found to be persuasive. persuasive.
- 3. Applicant's arguments filed August 25, 2009 with respect to the 35 USC 101 rejection have been fully considered but they are **not** found to be persuasive.
- 4. Applicant's arguments filed August 25, 2009 with respect to the 35 USC 103 rejection have been fully considered and they are found to be persuasive. The rejection has been withdrawn.

Claim Rejections - 35 USC § 112

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3624

Claim 1 recites the limitation "... standard deviations of the factors and the respective factors". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-2 are rejected under 35 U.S.C. 101. Based on Supreme Court precedent and recent Federal Circuit decisions, the Office's guidance to examiners is that a § 101 process must (1) be tied to a machine or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. In re Bilski et al, 88 USPQ 2d 1385 CAFC (2008); Diamond v. Diehr, 450 U.S. 175, 184 (1981); Parker v. Flook, 437 U.S. 584, 588 n.9 (1978); Gottschalk v. Benson, 409 U.S. 63, 70 (1972); Cochrane v. Deener, 94 U.S. 780,787-88 (1876).

An example of a method claim that would <u>not</u> qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a § 101 statutory process, the claim should positively recite the other statutory class (the thing or product) to which it is tied, for example by identifying the apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Art Unit: 3624

Here, applicant's method steps fail the first prong of the new Federal Circuit decision since they are not tied to a machine and can be performed without the use of a particular machine.

Remarks

8. With regard to the 112 second rejection, applicant asserted that the invention. Applicant asserted that "this claim is to recite the limitation of the scope as" the strategic positioning of companies in specific categories of business under the competitive and uncertain condition within an identified domain of industry which is classified based on the identified classification of Nikkei Economic Electronic Database System (to be shortened, NEEDS)." The claim is to express this limitation by calculating standard deviations of the factors of the specific categories of business within an identified domain of industry tied to an identified classification of NEEDS". See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). It is still unclear as to what factors and respective factors applicant is referring.

With respect to the 101 rejection, applicant argued that Applicants' intention to apply the invention is to preclude misleading presentation of results by method steps which does not tie to NEEDS machine in identifying the domain of industry classification. Applicants' method steps are tied to a particular machine and cannot be performed without the use of a particular machine. To express the tie to NEEDS machine, applicants modify the claims, and replace old claims with new ones as mentioned later. In response, the examiner respectfully disagrees because there is

Art Unit: 3624

nowhere in the claim that a computer is used for performing any of the steps. In order to overcome the 101 rejection, the claim steps must be performed using a computer.

Applicant is referred to the 101 rejection in paragraph 7 above.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Romain Jeanty whose telephone number is (571) 272-6732. The examiner can normally be reached on Mon-Thurs 7:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bradley Bayat can be reached on (571) 272-6704. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
